

FAQ – DATRON Axis4

DATRON Digital Experience Days 2.0

Can the rotary axis itself also be turned?

No, a mill-turn application in the sense of a high speed counter spindle is not possible due to the speed and the too low torque. However, a simultaneous winding of a toolpath is possible.

Does AXIS4 fit on an DATRON M7?

The Axis4 can only be used on machines with the DATRON next control. There are different adequate rotary axes available for the DATRON M7.

Is it possible to set up the 4 axis also with the DATRON neo?

Yes, the DATRON Axis4 can be used in combination with the DATRON neo.

What's the maximum rotation performance of AXIS4?

60 rotations maximum.

Can I set up the DATRON Axis4 myself or do I have to pay someone else to do it?

The DATRON Axis4 can be assembled and set up by the machinist thanks to its simple plug and play system.

Is it possible to watch the Digital Experience Days 2.0 live streaming again after ts has been broadcast?

The recording of the live streaming as well as the most important information about DATRON Axis4 including Q&A from the live chat in an FAQ document will available shortly at: experience.datron.de/digitalexperience2020_en
